

# ECOWOOD BRIQUETTES

## SUSTAINABLE FIREWOOD ALTERNATIVE

### ECO-FRIENDLY

No trees are harvested to create this product. Made from 100% natural recycled wood shavings & sawdust with no additives, chemicals or glues.

### CLEAN BURNING

Carbon neutral product creates less smoke, ash & creosote than regular firewood. Low moisture content allows a cleaner, hotter burn.

### SAFE

Minimal dangerous sparks or airborne embers. Ideal for outdoor use in fire-prone environments.

### ECONOMICAL

One ton of EcoWood Briquettes generates the equivalent BTUs of one-and-a-half cords of firewood. Available in one ton pallets.

### SPACE SAVING

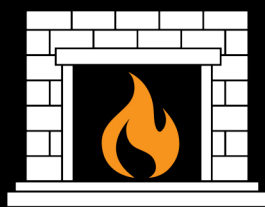

One ton of EcoWood Briquettes takes up half the space of one cord of firewood. Can be stored indoors with less mess.

### EASY TO HANDLE

Individual briquettes are lightweight, stackable and easy to transport.

WOOD STOVE

FIREPLACE

CAMPFIRE

BBQ

FIREPIT

PIZZA OVEN

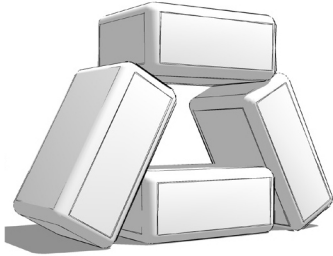

## MADE FROM 100% NATURAL WOOD SHAVINGS

EcoWood Briquettes are made from 100% natural recycled wood shavings & sawdust generated by our timber processing plant in Colorado. No additives, chemicals or glues are used. Material is compacted under high pressure, with naturally-occurring polymers in the wood acting as the binding agent. The result is a sustainable, clean-burning, stackable wood briquette that can be stored indoors. EcoWood Briquettes can be used in wood-burning stoves, fireplaces, firepits, campfires, pizza ovens, chimineas, and for outdoor cooking and recreation. Use alone or mix with regular firewood. Available in 12-packs or 1-ton pallets. Manufactured by Rocky Mountain Joinery Center LLC, 1005 S. 120th Street, Lafayette CO 80026 USA (720) 407-7760.

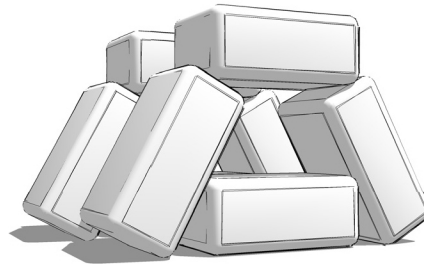

**KEEP PRODUCT DRY AT ALL TIMES. NOT SUITABLE FOR PELLET STOVES.**

# HOW TO LIGHT ECOWOOD BRIQUETTES

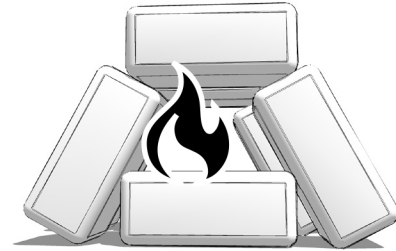

## STEP 1

Use 4 EcoWood Briquettes to build a pyramid as shown

## STEP 2

Build an additional pyramid, leaving 1" in between for airflow

## STEP 3

Place firelighter or kindling in center of pyramid and ignite

## STEP 4

Establish a strong burn before adding more briquettes

## STEP 5

If applicable, adjust dampers or vents to ensure a long, steady burn
